FRUITS I DON'T RECOMMEND PLANTING THIS FALL

All the other items listed here in this Seed Sense and Fall Catalog do excellently planted in the Fall. The 6 months of Winter gives them 6 months head start over Spring planted stuff and they grow all that 6 months—getting their roots well established.

But there are some items which I do not recommend planting in the Fall because either their root systems are so shallow they might heave out in the freeze and thaw or because they are too tender. Even though I would like to sell them, I cannot accept orders for them as I know they would not do well for you Fall planted. Now don't get mad at me for that. I'm honestly thinking of your own good and will supply them—all you want—in the Spring.

The following items I will not furnish this Fall but will have in good quantity for you next Spring:

- Red Raspberries
- Black Raspberries
- Blackberries
- Boysenberries
- Peaches

MULE HYBRIDS ARE THE FINEST HYBRIDS YOU CAN BUY

MULE-HYBRID IS FINEST HYBRID YOU CAN BUY!

ACREAGE—Every one of the 3000 acres on which Mule-Hybrid is grown is carefully checked to see that no possible contamination from other corn can get to it. It's perfectly isolated.

CAREFUL DETASSELING—Over 500 men were engaged in detasseling Mule-Hybrid this summer. Every 10 men had a crew "boss" to be sure no tassels were left to contaminate field. Every field was "gone over" at least 5 times—sometimes 10.

\$100,000 WORTH OF INBREDS USED—Into Mule-Hybrid corn goes the finest inbreds in the country. Carefully bred and selected, they are stored in fire-proof safes, fumigated frequently and protected by every method known.

TESTED—All Mule-Hybrids before they are approved for sale must pass vigorous tests for years to be sure they are: High sure yielders; Drought Resistant; Cold Resistant; Disease Resistant; Lodging Resistant; Uniform and easy pickers; Non-suckering.

GERMINATION 90% or better—Every lot of corn is germinated twice or more to be sure it germinates 90% or better which is guaranteed. You may test it yourself and if you don't approve, return for full refund.

CAREFUL GRADING—Each lot of corn is graded to absolute uniform perfection whether edge drop (flat), or hill-drop (round) so that it will run through your planter plates absolutely perfect.

CORN DUST TREATED—Every lot is completely treated with a special Corn Dust to hasten germination and help prevent damping off and molestation by rodents.

MULE-HYBRID'S RECORDS ON FARMS PROVE IT'S BETTER CORN

96 Bu. Per Acre

"Your No. 129 made 96 bushels per acre on my farm and outyielded (a \$7.50 hybrid name omitted intentionally) by 29 bushels per acre."—G. C. Schoening, Carson, Iowa.

Outyielded 4 \$7.50 Hybrids

"Your 129 S outyielded the four \$7.50 hybrids at least by 10 bushels per acre, so naturally I'm placing my order for my entire acreage next year."—R. E. Parkes, Malvern, Iowa.

Mrs. Henry Bright, Pontiac, Mich., by a field of MULE - HYBRID corn. Yield — over 100 bu. A. Says they will never plant any other corn but Mule-Hybrid, now.

Mule-Hybrid Likes Hot Weather

"I planted your No. 116 this year and 3 other well known hybrids. No. 116 is far superior in quality and yield. It stood the hot, dry weather remarkably well. It's corn anyone can be proud to raise. Everyone inquired about it."—W. M. Schwartz, Blairstown, Ia.

72 Bu. Per Acre in Nebraska

"We planted your 116 corn on real poor soil and it still yielded 72 bu. per acre. I had 129 R that yielded 100 bu. to the acre. The 100 acre field of your No. 116 yielded about 70 bu. per acre. I planted 22 bu. of your corn. I have bought corn from you for 25 years and my corn always outyielded my neighbors. I will need 30 bu. for 1941."—Martin McShane, Omaha, Nebr.

80 Bu. Per Acre in Missouri

"I tried your MULE-HYBRID last year and was very well pleased. Had an average yield of 80 bu. per acre. Beat Mo. 8 by 20 bushels per acre."—G. T. Miller, Bernie, Mo.

Official Test—96.8 Bu. Per Acre

"On Waukesha loam in the official Guthrie County yield test, Mule-Hybrid made 96.8 bu. per acre with your No. 129 series."—Paul Herrick, Guthrie Center, Ia.

Best Feed Corn

"We planted your Mule-Hybrid alongside several other brands and Mule-Hybrid outyielded the others by 10 to 15 bu. per A. The Mule-Hybrid was nice and dry too, and was the BEST FEED CORN of the group. This hybrid does everything you say it does."—Mrs. Helen Reimers, Lake Park, Iowa.

WILL BE HIGHER BY SPRING....

We Are Gambling With These Prices

With the cool, late, wet spring we had and the prospects of an early, wet fall that will be hard on corn, these prices may be WAY TOO LOW. But I believe in giving the early buyer the best possible price so HERE'S YOUR CHANCE TO RESERVE YOUR CORN AT A REALLY LOW PRICE.

I have no doubt that corn is going to be higher in the spring. It may even be, there won't be enough high-germinating seed to go around. So here's your chance, not only to get a real saving in price, but also to MAKE SURE YOU HAVE GOOD SEED FOR NEXT SPRING. BOOK YOUR CORN NOW.

Buy Your Hybrid DIRECT . . . Save the Difference for Yourself

Most of you know the agent who sells you corn makes from \$1 to \$3 per bu. commission for himself. That's all right if you have plenty of money.

But there's really no sense in your having to pay from \$10 to \$30 extra when you buy 10 bushels of corn. You can BUY THAT CORN DIRECT FROM THE GROWER and SAVE THAT DIFFERENCE FOR YOURSELF.

I always did believe in selling DIRECT TO YOU and cutting out the middleman's profit. That way you get the best seed possible and the best price, too. No reason why you shouldn't get the same on hybrid corn.—H. F.

Only \$1⁰⁰ Per Bu. Down Payment

This time of the year, most of us farmers are a little short of cash. That's why I'm asking only \$1.00 per bushel down payment to hold your corn for you at these very low opening prices.

Send your reservation now, WITH ONLY \$1.00 per bu. just to bind the bargain on both of us, so I'll stay hitched. Pay the balance just before the corn is shipped. That's fair, isn't it?

FREIGHT PAID!

Don't let anyone tell you freight on corn is expensive. It isn't. Just to prove it, for only 30c per bushel on my Mule-Hybrid corn, I'll pay the freight anywhere in Iowa, Missouri, Kansas, Illinois, Minnesota, and Nebraska. And for only 60c per bushel, I'll pay the freight into any other state. Just add that amount per bu. to your order and say, send freight paid.

FREE STAND GUARANTEE!

Every bushel of Mule-Hybrid corn sold during this fall sale is covered for you FREE by the Henry Field stand guarantee, which guarantees you a stand of corn according to terms below. Our corn is perfect—that's why we can do this—and you don't have to pay \$8.50 a bushel to get this guarantee:

Henry Field guarantees that you will get a perfect stand of Mule-Hybrid until the corn is 6 inches high regardless of insects, weather or other causes. If you should not, he will furnish sufficient corn FREE for replanting this acreage, or if adapted varieties are not available, will furnish such corn the following year—all corn replaced to be FOB Henry Field warehouses. This guarantee is only operative if proper plates are used and adequate corn for a normal stand is planted.

(Signed) Henry Field
